

DanishFashionInstitute

Copenhagen's Grand Experiment: Achieving Zero Textile Waste

AGENDA

1. Project objectives and background
2. Project overview
3. Next steps

DanishFashionInstitute

- A network organisation with 120 members
- Works to promote Danish fashion internationally:
 - Contribute to knowledge sharing and development, innovation and an increase in exports
 - Gain international recognition for design, quality, and aesthetic values

NICE

Nordic Initiative, Clean and Ethical is a joint commitment from the Nordic fashion industry to take a lead on social and environmental issues

NORDIC FASHION ASSOCIATION

THE DANISH TEXTILE RECYCLING SYSTEM

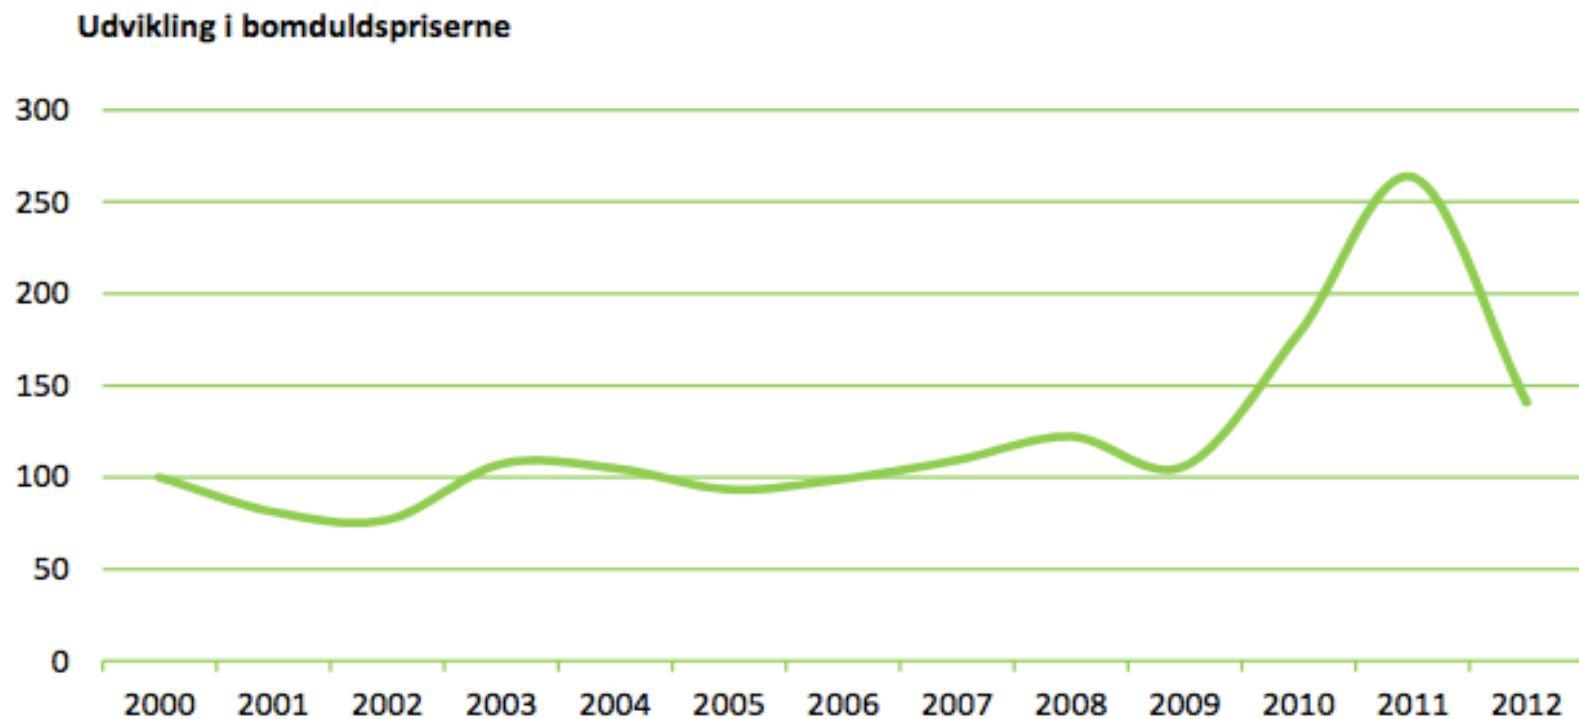

- PROJECT OBJECTIVES -

PROJECT OBJECTIVES

- 50 => 90% return rate and increased re-use
- Minimised incineration rate
- Increased volume of ‘cream’ to charities
- Increased volume to recycling
- Minimise risks in the supply chain
- Minimise costs for raw materials
- Create green growth (and jobs)
- 100% transparency

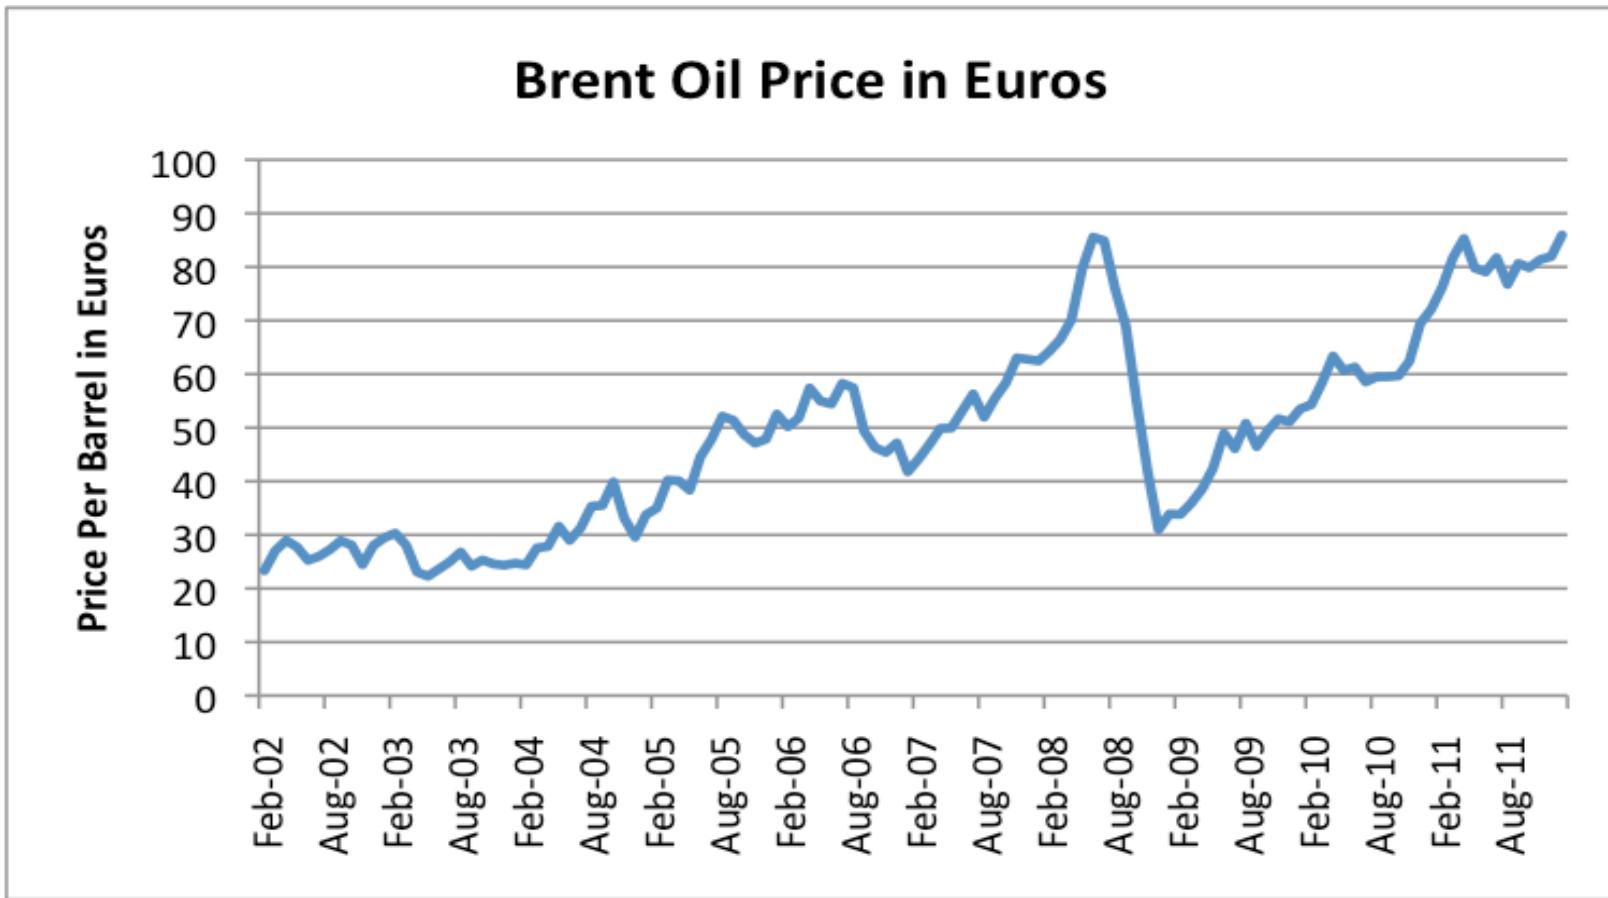

PROJECT BACKGROUND

INCREASED RISK: COTTON

Kilde: National Cotton Council of America

INCREASED RISK: OIL

FASHION = CONSUMPTION

Social-Liberals: A refund and deposit system for apparel

Lone Loklindt, miljøordfører hos Radikale Venstre, foreslår et pantsystem, så man kan komme tøjspild til livs – og samtidig skal det tilskynde branchen til at genbruge flere materialer.

CURRENT FACTS (DK)

- **89.000 tonnes textiles discarded per year (apparel and home textiles)**
- 33.000 tonnes (37%) are collected via charity containers and shops (10% goes to incineration and 50% are exported)
- 7.000 tonnes (8%) are collected by private actors (43% goes to incineration and 57% is exported)
- 24.000 tonnes (27%) are incinerated via household waste
- 20.000 tonnes (23%) “gap”
- 3.000 tonnes (3%) accumulation
- 2.000 tonnes (2%) industrial waste

MARKET POTENTIAL

- There is a great potential for further collection of used textiles in Denmark
 - Between an extra of 24.000 tonnes (conservative)
 - and 48.000 tonnes (optimistic)
 - depending on business model and the ability to collect from households
 - potentially add another 20.000 tonnes of textiles currently being exported
- Increased return percentage is dependent on the ability to compete with international market prices

THE DANISH TEXTILE RECYCLING SYSTEM

- PROJECT OVERVIEW -

PROJECT FUNDING

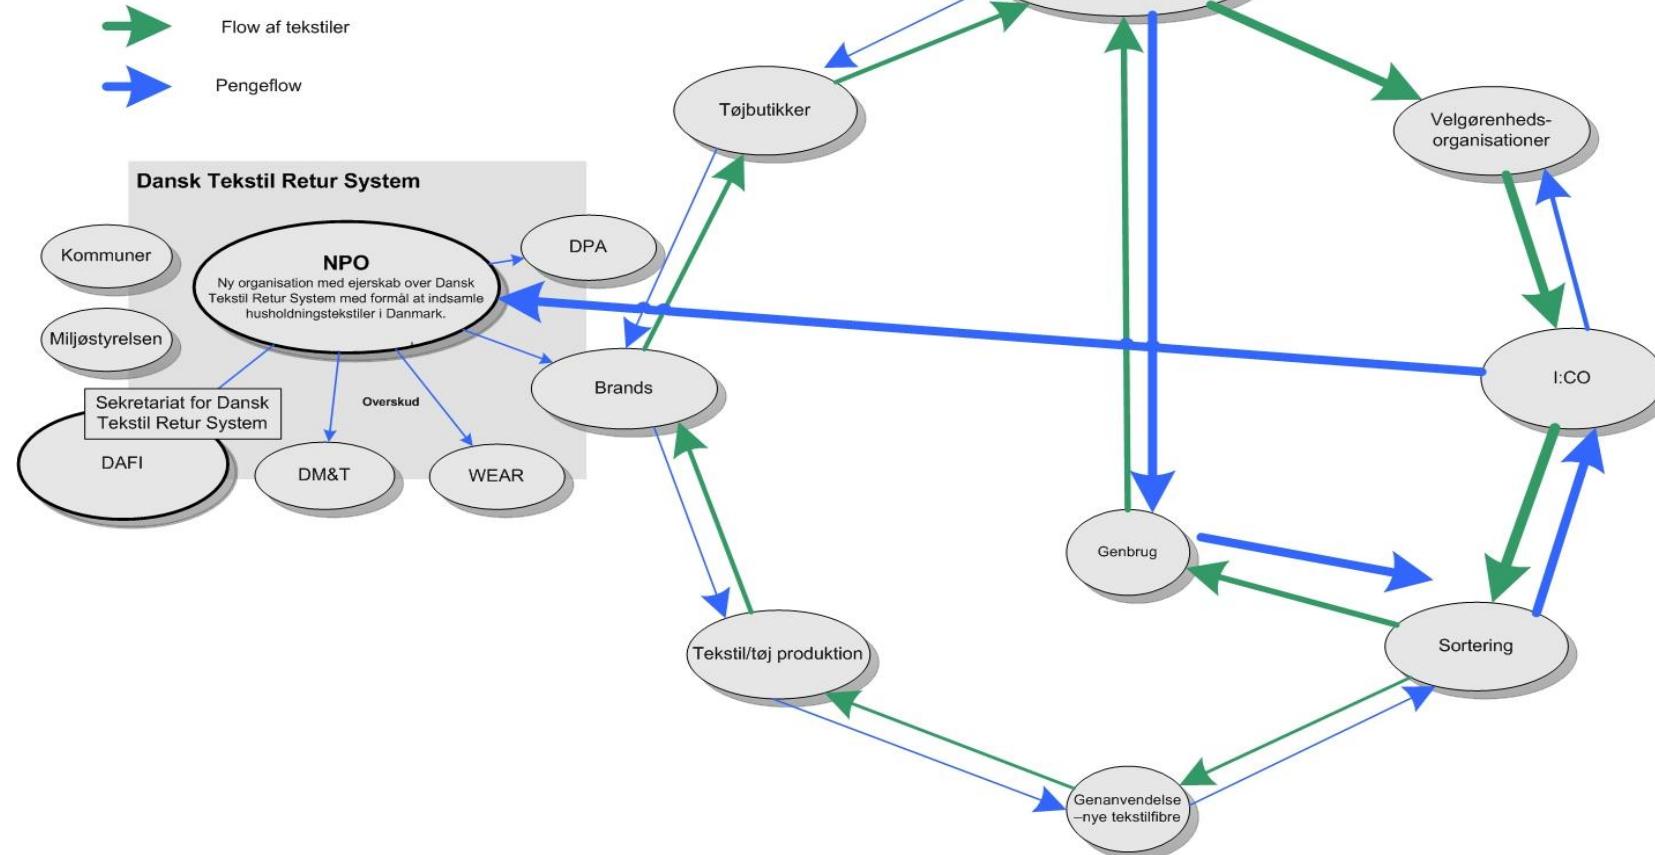

- Funded by a DKK 300K grant from the Market Development Fund under the Danish Business Authority
- Project period: 6 months (phase 1: 1/1-26/6)
