invitation

annual program meeting sep 27 - 28 2017

program meeting sep 27

when: Sep 27, 2017, 10.00-17.00 (open from 9.30)
where: Spårvagnshallarna, Birger Jarlsgatan 57A, Stockholm

Annual program update Mistra Future Fashion

- Lunch -

Theme Updates in breakout sessions

Joint panel discussion

workshops sep 28

when: Sep 28, 2017, 8.30-17.00 (open from 8.00)
where: Stockholm School of Economics, Sveavägen 65, Stockholm

**Workshop: practical use of the concept of Sustainability in Mistra Future Fashion
Criteria for Sustainability and how supply chain solutions take us there**

In the Supply Chain Theme, we will evaluate a range of solutions for making the fashion supply chain more sustainable. In this workshop, you will have the opportunity to propose solutions for us to evaluate. You will also contribute to the study yourself, by providing your knowledge on a set of predefined sustainability and feasibility criteria, and by suggesting additional criteria. By doing this, you will help us identify new exciting solutions and to capture various stakeholders' view on what a sustainable solution is, thereby contributing to a common view of sustainability that is actionable and relevant for our work in the Mistra Future Fashion programme.

Parallel workshops

Workshop Supply: Making use of LCA data

How do we mobilize the large LCA study with detailed inventory data for textile production for use in the textile industry? Three alternatives are proposed: 1) Integrate with the SAC Higg Index/MSI database, 2) Integrate with a global PLM system, 3) Use in a simplified tool for use in product development and purchase department

Workshop Recycling: Is in-built recyclability a future track of sustainable cotton coloring?

Color is an obvious bottle-neck for cotton recycling. An appealing approach would be to include the reuse and recycling already in the coloring process, for example by chemically coding an On/Off feature. What are the challenges of this approach? What are the key to succeed? What is to be invented?

Workshop User: Driving more sustainable consumption

Building on consumer behavior research findings we propose to pilot communication tools aiming to educate consumers about how to consume more eco-conscious and thus promoting/influencing more sustainable consumption.

- Lunch -

Sister project seminar

Nordic Council of Ministers Workshop: Stimulating Recycling in the Textile Industry

Case presentations from Nordic brands on the journey: use of recycled materials in new products >>> designing garments for recycling >>> full closed loops. Matchmaking sessions between suppliers of recycled yarns and fabrics and brands. We will bring together brands, recyclers and suppliers of recycled yarns and fabrics together to move the recycling agenda forward.

more detailed invitations about the workshops to come

RSVP latest Sep 1st [here](#)

Please note that for non-partners there will be a fee of 4000 SEK (2500 SEK for NGOs)
